

Your Brain Is Built to *Change*

GROWTH MINDSET +
THE POWER OF NEUROPLASTICITY

Your brain is not fixed. It is constantly adapting, learning, and creating new pathways throughout your life.

CHANGE
IS NOT A SIGN
OF WEAKNESS—
IT'S A NATURAL
PART OF BEING
HUMAN.

What Is Neuroplasticity?

Neuroplasticity is your brain's ability to reorganize itself by forming new neural connections through experience, learning, and repetition.

YOUR BRAIN
CHANGES
THROUGHOUT
YOUR LIFE.

NEW
CONNECTIONS
CAN ALWAYS
BE BUILT.

THE BRAIN
CAN HEAL
AND ADAPT
AFTER STRESS
AND TRAUMA.

What Is a Growth Mindset?

A growth mindset means believing that your abilities, skills, and intelligence can improve with effort, strategy, and support.

FIXED MINDSET

Believes abilities are set and can't change.

"I'm just not good at this."

"I can't do it."

"I make too many mistakes."

"It's too hard."

GROWTH MINDSET

Believes abilities can improve with effort and practice.

"I can learn this with time and effort."

"I can't do it yet."

"Mistakes help me grow."

"It's challenging, but I'll keep trying."

How Neuroplasticity Works

NEURONS THAT FIRE TOGETHER, WIRE TOGETHER.

1. EXPERIENCE

When you have a new experience, neurons in your brain activate.

2. REPEATED PRACTICE

The more you practice, the stronger the connections become.

3. NEW PATHWAYS

With repetition and challenge, your brain builds new and stronger pathways.

4. LASTING CHANGE

These new pathways make it easier to think, feel, and behave in new ways.

Practical Ways to Grow Your Brain

TAKE ON CHALLENGES

Step outside your comfort zone in small, manageable ways.

PRACTICE REGULARLY

Repetition builds stronger brain connections.

LEARN FROM MISTAKES

Mistakes are not failures — they're essential for growth.

USE KIND, REALISTIC SELF-TALK

Talk to yourself like a supportive coach.

SEEK SUPPORT

Positive relationships and safe environments help your brain thrive.

KEEP A CURIOUS MIND

Stay open, ask questions, and explore new things.

PROGRESS, NOT PERFECTION

Your brain is always learning, always changing, and always capable of more than you think.
